

SEPA IWG: Roadmap to September Draft: 8/1/08

| Bucket /Sub-bucket | Products Completed on/before September 30 | August 5 Agenda teleconference | August 28 Agenda in-person | September 9 Agenda teleconference | Sept. 30 Agenda in-person* |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|----------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| "Leverage SEPA" | a. "Menu" of GHG emission types that can be disclosed under SEPA, along with description/analysis according to criteria and test cases; test cases will illustrate what types of proposals generate what types of emissions. | Present and discuss draft emission type menu, criteria analysis, and test cases | -- | Review draft "roll-up" tables that pulls together information on emission types, tools, and mitigation strategies for projects and non-projects (see back page for possible model) | |
| "What do we measure" | b. Identification of a set of "key emission types" that are essential to address | Direction or decision on identifying a set of "key emission types" that are essential to address/ | | Review draft tools table and identify "gaps," especially for key emissions types identified on Aug. 28 (see above) | |
| "Sub-bucket 1.B)" | c. Table of emissions calculation tools with description/analysis according to types of emissions, projects, and criteria | Discuss tools analysis and potential need for new tools or approaches | -- | Direction or decision on whether the IWG should recommend creation of new tool or approach | |
| "Sub-bucket 1.C)" | d. Indication/recommend development of a new tool or approach | | | | |
| "Sub-bucket 1.C)" | e. IWG recommendation on the approach to statewide consistency and a clear description of the approach. | Continue discussion of options for statewide consistency | Discuss draft list of options for different types of standards | Review "final" list of options for significance standards | |
| "Sub-bucket 1.C)" | f. List of options for significance standards (and, if possible, some direction on which seem most appropriate) | Direction on statewide consistency | Direction on type of standard | Direction or decision on recommended approach (both statewide consistency and type of standard) | |
| "Bucket 2)" | g. Description of mitigation options related to different emission types/sources, along with available information on feasibility, costs, etc. | Present and discuss draft description of mitigation options | Present and discuss draft description of mitigation options | Review refined description of mitigation options | |
| "Bucket 3)" | h. Identification of "gatekeeper" policy questions for mitigation | -- | Discuss draft list of key mitigation issues | As time allows, begin discussion of key issues | |
| "Bucket 3)" | i. Description of ideas for incentives and disincentives to "leverage SEPA" for climate-friendly development | -- | | Discuss draft list of ideas for incentives/disincentives | |
| | | | | Direction on which approaches to pursue further as a group | |

*On September 30, will also discuss 1) rule or legislative changes suggested by work to date or 2) funding requests that may be necessary.

Illustration of possible “roll up” table (there would be two tables—one for projects, one for non-projects)

| Type of Emission (potentially ranked or categorized according to importance) | Typical Projects/Non-projects for Type of Emission | Best Tools to Measure Emissions | Relevant Mitigation Options |
|------------------------------------------------------------------------------|----------------------------------------------------|---------------------------------|-----------------------------|
